KitchenAid® Architect® Series II Undercounter Beverage Centers

KitchenAid® Architect® Series II Undercounter Beverage Centers enhance style and functionality in the kitchen and other areas of the home used for entertaining. With three temperature zones, homeowners can store red wines in the bottom rack, white wines in the middle and additional beverages on top – all at the appropriate temperatures. The LED screen displays temperatures of each zone. Beverage centers are available in stainless steel, black-on-stainless and factory-installed overlay-style trim.
