## KitchenAid® Freestanding and Slide-In Ranges

New KitchenAid® Freestanding and Slide-In Ranges offer peak performance and cutting-edge design, driving the entire KitchenAid® Architect® Series II appliance suite.

Throughout the series aesthetics include newly designed handles, high-precision knobs, and a soothing blue LED display with touch glass controls. A front-mounted

control panel places intuitive oven and cooktop controls in the front, so cooks do not have to reach over a hot

cooktop. Other features include gas and electric true

convection cooking, warming drawers, large windows, die-cast consoles, and versatile

temperature management systems. Ranges are available in electric, gas and dual fuel oven

configurations. Gas and dual fuel ranges feature full-width, recessed grates. Electric ranges

feature a frameless glass cooktop with beveled edges for a built-in look and a touch-

activated, no-knob console.
