KitchenAid® 42" Built-In French Door Refrigerator

KitchenAid® 42" Built-In French Door Refrigerator provides exceptional refrigeration room without taking additional cabinet space. The narrow door swing enables design flexibility and creates smooth traffic flow in the kitchen, particularly in those with an island. With 22.5 cubic feet of interior space, homeowners will enjoy the most capacity of any built-in bottom-freezer in the industry. These refrigerators offer the KitchenAid® exclusive ExtendFresh™ temperature management system and ingredient care centers that allow temperatures inside drawers to be changed to accommodate certain foods. The industry's first built-in 42" French door bottom mount supports homeowners' enjoyment of cooking and entertaining.
