## KitchenAid® Architect® Series II Dishwashers with Steam Option

KitchenAid® Architect® Series II Dishwashers with Steam Option provide the powerful cleaning for which KitchenAid brand is known, while using less water. The steam option enhances an existing wash cycle, such as the china cycle, to produce an even more lustrous shine on glasses. These dishwashers are not only ENERGY STAR® qualified, but also ENERGY STAR® Tier II Qualified, offering even more energy savings and additional energy cost savings in select states through utility rebates. The ProScrub® Option provides concentrated cleaning during the normal wash cycle for harder to clean items such as casserole dishes with baked on food. An Optimum Wash Sensor adjusts the wash cycle to specific water conditions for maximum cleaning efficiency. The Whisper Quiet Ultima™ Sound Insulation System features sound dampening components throughout the dishwasher unit to make the Architect® Series II dishwasher the quietest dishwashers from KitchenAid brand.
