Whirlpool® Duet® Steam Dryer

The Whirlpool® Duet® Steam Dryer features cutting-edge drying and refreshing technology to meet the needs of time-pressed homeowners. Clothes dry evenly with a gentle, but powerful, combination of mist and heat that relaxes wrinkles and removes odors inside the dryer. This dryer delivers the benefits of steam technology by using the water line

from the washer to spray a fine mist on clothes. The resulting water vapor gently penetrates fabrics to lift out odors and relax wrinkles. For clothes that may not be dirty but need a quick freshening, the Quick Refresh cycle relaxes wrinkles and removes odors in about 15 minutes. Additionally, the time-saving AccelerCare™ feature minimizes drying time so that dry time equals wash time.
